SPECIAL TO WOMEN
The most economical, cleansing and
germicidal of all antiseptics is

Paxtine
A soluble Antiseptic Powder to
be dissolved in water as needed.
As a medicinal antiseptic for douches
in treating catarrh, inflammation or
ulceration of nose, throat, and that
caused by feminine ills it has no equal.
For ten years the Lydia E. Pinkham
Medicine Co. has recommended Paxtine
in their private correspondence with
women, which proves its superiority.
Women who have been cured say
it is "worth its weight in gold." At
druggists. 50c. large box, or by mail.

ROOT INJURIES TO PLANT
Many Crops Are Affected by Parasitic
Diseases—Eradicate by Keep-
ing the Land Bare.
(By N. FULTON.)
Root knot trouble occurs in sandy
types of soil in some sections of the
United States. Many crops are affected,
including alfalfa, vetch, clovers,
tobacco, potato, sweet potato, water-
melon, cucumber, cantaloupe and to-
mato. Many other crop plants are
affected as well. A few of the com-
mon weeds, such as pigweed, wild
carrot, purslane and morning glory
are also subject to root knot troubles.
Enlargements of irregular shape
and size may appear anywhere on the
root system. Affected plants are stunt-
ed in growth and their foliage is a
lighter shade of green than normal.
This, however, may be hard to de-
tect when a large area is uniformly
infected.
The trouble is caused by a very
small worm belonging to the group
of Nematodes. The worm may live
in the soil for months, but quickly die

An Affected Plant.

in the galls after the death of the
plant. A generation, from egg to egg,
is about a month, and one female
usually lays several hundred eggs.
The worm lives over winter in pro-
tected parts of the soil, or in the galls
on perennial plants. They are readily
transported to distant places on ng,
peach, or mulberry trees, or in Irish
seed potatoes.
Areas can be most quickly cleared
of the infestation by keeping the land
absolutely bare for two years. The
next most effective plan is to plant
for two years in resistant crops, as
winter rye or oats followed by iron
cowpeas or peanuts and repeat the
second year. Susceptible weeds must
not be allowed to grow. Some re-
duction can be accomplished by break-
ing the land deep in dry weather and
allowing it to dry out as much as pos-
sible.

A TEXAS WONDER.

The Texas Wonder cures kidney
and bladder troubles, dissolves
gravel, cures diabetes, weak and
sore backs, rheumatism, and all
irregularities of the kidneys and
bladder in both men and women.
Regulates bladder troubles in chil-
dren. If not sold by your druggist,
will be sent by mail on receipt of
\$1.00. One small bottle is two
months' treatment, and seldom fails
to perfect a cure. Send for testi-
monials from this and other states.

Where Women Rule.

In certain parts of Tibet, South
America, and elsewhere, the women
are supreme in the management of
things. They are probably the survi-
vals of the time when women univer-
sally "bossed" the men. Such was the
general condition away back in the
early tribal times of which history
gives us but a scanty account. The
fact is beyond question, however, that
woman was "boss" a long, long time
before she became the "weaker ves-
sel" and took to playing "second fide-
le."

How To Give Quinine To Children.

FERBRILINE is the trade-mark name given to an
improved Quinine. It is a Tasteless Syrup, pleas-
ant to take and does not disturb the stomach.
Children take it and never know it is Quinine.
Also especially adapted to adults who cannot
take ordinary Quinine. Does not nauseate nor
cause nervousness or ringing in the head. Try
it the next time you need Quinine for any pur-
pose. Ask for 2-ounce original package. The
name FERBRILINE is blown in bottle. 25 cents.

All Right Without "Explanation."
"Please read me the poem you're
reading mother?" begged a little boy
sweetly. "But I'm afraid it's too old
for you, dear," his mother answered.
"I'm afraid you wouldn't be able to
understand it." "Oh, yes, I would,"
was the calm answer, "so long as you
didn't try to explain."

Contentment and Health.

After all, the question of livable-
ness in any environment is, as a rule,
one of the temperament and adaptability
of the individual. This is the opinion
of the Journal of the American
Medical association. Americans have
braved the dreaded tropics with
comparative comfort and remained in
perfect health. Manila and Panama
have lost the terrors of climate, while
the far North has become the field of
pleasure seekers. The healthfulness
of an environment, urban or suburban,
inland or coastwise, has become al-
most entirely a question of personal
hygiene and mental satisfaction
coupled with the indispensable accom-
paniments of public sanitation.

SKIM MILK VALUABLE DRINK
Repeated Tests Demonstrate Pullets
Lay More Eggs in Winter When
Fed on This Diet.

To test the value of skim milk for
laying hens, 60 pullets were put in
two pens, equally divided, of one vari-
ety and all as near of an age as
possible. They were fed exactly alike,
keeping strict account of their feed,
but given different drinks. One pen
had sweet skim milk, while the other
had only plenty of fresh water.

This test was begun on November
1 and accounts were balanced with
both pens on May 1 following. The
hens that drank the water had but a
little over half as much credit for eggs
laid, while their feed had cost nearly
a third more than the pen which were
fed skim milk. Some days in the very
coldest weather the milk-fed pen of
30 pullets laid 28 eggs, and their av-
erage for January was 24 eggs daily.
The skim milk-fed pen not only pro-
duced many more eggs, but they did
not consume as much food as the other
pen.

Since then these tests have been re-
peatedly tried with different breeds
and with the same results.

CORN VALUABLE FOR POULTRY

Not Much Danger of Becoming Over-
fat, if Compelled to Exercise for
Their Grain.

Corn is a valuable poultry food,
and it is in its abuse and not its use
that it is to be condemned. Some
fowls become fat on almost any kind
of food, while others will not fatten
even on corn. There seems to be a
good bit of human nature about the
makeup of the hen. If hens are made
to exercise for their grain, and are in
a good laying condition, there is not
much danger of their becoming over-
fat. In fact it is rather a difficult
matter to overfatten laying hens. It
is when they are slack in laying and
become lazy that the fat seems to start
to grow. When hens become too fat
they should be placed in a separate
yard where there is no male bird, as
the attention of a male to an overfat
hen is apt to hasten death. If such
hens are given only an evening feed
of wheat and nothing during the day
except green food and water they
will soon lose considerable of their
surplus fat.

Motorcycle as Chaff Cutter.
A farmer at Bantnall, Salop, Eng-
land, has fixed his motorcycle on a
stand against the wall of the farm
buildings, and it drives a chaff-cutter
and turnip cutter at the same time.
It does not cost much to work it. The
turnip cutter is on the same level as
the cycle, and is connected by a kind
of bicycle chain. The chaff-cutter is
placed above the turnip-cutter on an-
other floor and connected by two-inch
belting. After it has been on some
little time the engine gets hot, so a
fan is made to revolve by the side to
keep it cool. It is also used for
churning milk. This saves a great
deal of time for the workmen because
it can do the two jobs at once.

Couldn't See Place for "Pa."
A prominent Virginian had died,

said, "dis surely is fine, all dese here

Fluke Hog of the Sea.

The slab-sided, flat-bottomed fluke
is not a game fish, but he is muscular,
and when he decides to bore down to
the bottom his flat shape aids him in
giving a good account of himself. He
is the hog of the sea, although he pre-

hooked the fish will lie still and not
move until the angler notifies him by
hauling upward. Then the fluke gets
busy.
